

## RELEASE NOTES 41.3.1.1

The *PostalOne!* system Release 41.3.1.1 was implemented on October 23, 2015 to introduce software fixes to the system. This includes corrections to issues previously identified in a prior release. Related database changes were implemented on October 26, 2015.

These Release Notes provide the contents of the release and affected subsystems.

Contents of this document are subject to change.

Please note the following regarding the Mail.dat client download.

Mail.dat client	Status
41.3.1.0_PROD	Optional, users can continue to submit files using the earlier Mail.dat client versions below
41.3.0.2_PROD	Optional, users can continue to submit files using the earlier Mail.dat client versions below
41.2.0.0_PROD	Expires November 1, 2015
41.1.0.0_PROD	Expires November 1, 2015

# 1. Corrections to Known Issues

The information for this section is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs).

## 1.1 Electronic Data Exchange

An issue has been corrected that affected Periodicals postage statements (PS 3541) with carrier route pallets submitted through Mail.dat. Previously, Mail.dat Periodicals with container levels specified as Carrier Route Pallets on postage statement lines E83 – E89 were incorrectly mapped to container levels for 5-Digit Pallet (lines E76 – E82). As a result of the incorrect mapping, affected customers were erroneously charged the higher 5-Digit Pallet rate even though their mailing submission was set up for Carrier Route Pallet pricing. Although the mapping logic was updated with the release on October 23, 2015, a database update was necessary for the resolution to take effect. Missing container level values were added on October 26, 2015 to complete the resolution of the issue. [8348 {B}](#)
